## About Brachiosaurus

The name Brachiosaurus means "arm lizard". Brachiosaurus was one of the biggest and tallest dinosaurs and it had a very large neck and relatively small head. He was a herbivore which means he was a plant eater and he probably used his large neck to eat off the tops of tall trees. Brachiosaurus was as big as 85 feet long and 50 feet tall. Brachiosaurus lived during the late Jurassic period, between 155 million and 145 million years ago.

Now see if you can answer the questions below about Brachiosaurus:

What does a Brachiosaurus eat?

Cookies

Meat

Plants
