4. Florence picked up 88 seashells from the beach. She decided to give them out to 11 friends. How many seashells would each friend get?
5. Gillian made 48 paper flowers for her class of 12 kids. How many flowers would each kid get if split evenly?

# Advanced Division

Use division to solve the problems below. Show your work.

1. Andrea has 30 photographs that need to be put in an album. The album has 10 pages. How many photographs at least can Andrea put on each page?

$$30 \div 10 = 3 \text{ photographs}$$

2. Beatrice bought 20 postcards during her trip to Korea. She spent \$100. How much did each postcard cost?

**PREVIEW**

[www.allkidsnetwork.com](http://www.allkidsnetwork.com)

$$100 \div 20 = \$5$$

4. Florence picked up 88 seashells from the beach. She decided to give them out to 11 friends. How many seashells would each friend get?

$$88 \div 11 = 8 \text{ seashells}$$

5. Gillian made 48 paper flowers for her class of 12 kids. How many flowers would each kid get if split evenly?

$$48 \div 12 = 4 \text{ flowers}$$
