

Name _____

Fractions Adding

Step 1: Make sure the denominators are the same

Step 2: Add the numerators, put the answer over the denominator

Step 3: Simplify the fraction if needed

$$\frac{4}{5} + \frac{1}{5} = \boxed{} = \boxed{}$$

$$\frac{2}{9} + \frac{4}{9} = \boxed{} = \boxed{}$$

$$\frac{1}{5} + \frac{}{} = \boxed{} = \boxed{}$$

$$\frac{4}{3} + \frac{}{} = \boxed{} = \boxed{}$$

$$\frac{1}{15} + \frac{2}{15} = \boxed{} = \boxed{}$$

$$\frac{2}{18} + \frac{4}{18} = \boxed{} = \boxed{}$$

$$\frac{4}{14} + \frac{3}{14} = \boxed{} = \boxed{}$$

$$\frac{4}{20} + \frac{6}{20} = \boxed{} = \boxed{}$$

$$\frac{2}{21} + \frac{5}{21} = \boxed{} = \boxed{}$$

$$\frac{9}{24} + \frac{9}{24} = \boxed{} = \boxed{}$$

Fractions Adding

Step 1: Make sure the denominators are the same

Step 2: Add the numerators, put the answer over the denominator

Step 3: Simplify the fraction if needed

$$\frac{4}{5} + \frac{1}{5} = \frac{5}{5} = 1$$

$$\frac{2}{9} + \frac{4}{9} = \frac{6}{9} = \frac{2}{3}$$

$$\frac{1}{5} + \frac{6}{5} = \frac{7}{5}$$

$$\frac{4}{3} + \frac{7}{3} = \frac{11}{3}$$
