Rounding Worksheet

Solve the following problems below by rounding. Show your work.

1. Becky applies sunscreen every 2 hours. If she applies 0.3 ounces each time then how much sunscreen does she use over 6 hours? Round the final answer to the nearest whole number.

$6 \div 2 = 3$ $3 \times 0.3 = 0.9$ $0.9 = 1$ ounce

2. A ...he
u... ...nd
th...

$16.5 - 7.3 = 9.2$ $9.2 = 9$ ounces

3. Zack used 3.1 ounces of sunscreen and Carmen used 2.7 ounces of sunscreen. How many ounces did they use altogether? Round the final answer to the nearest whole number.

$3.1 + 2.7 = 5.8$ $5.8 = 6$ ounces
