5. Now the number of \_\_\_\_\_ cars is 4 times the number of \_\_\_\_\_ cars.

6. An hour later, only 3 empty spots are left in the parking lot. How many cars have come within the past hour?

1. There are 4 rows in this parking lot, and each row has 9 parking spots. How many spots are there in the parking lot?

$$4 \times 9 = 36 \text{ spots}$$

2. Count the cars that are in the parking lot now. Can you figure out how many empty spots there are?

There are 17 cars in the parking lot now.

$$36 - 17 = 19 \text{ empty spots}$$

the parking lot now?

$$17 + 3 - 1 - 4 = 15 \text{ cars}$$

5. Now the number of blue cars is 4 times the number of green cars.

6. An hour later, only 3 empty spots are left in the parking lot. How many cars have come within the past hour?

$$36 - 3 - 15 = 18 \text{ cars}$$
