# Exploring Ocean Animals Part 1

Read the passage about different kinds of ocean animals. Then, answer the questions based on what you have learned. You can write your answers on a separate sheet of paper, or discuss the answers as a group activity.

The ocean is home to many fascinating animals. Let's dive in and learn about some of them!

**Dolphins:** Dolphins are intelligent mammals that live in oceans. They are known for their playful nature and their ability to swim fast.

Dolphins are found in all the world's oceans. They are found in the Atlantic, Pacific, Indian, and Arctic Oceans. Dolphins are found in the warm waters of the tropics and the cold waters of the poles.

Cloves are a type of spice that is made from the dried flower buds of a tree called Clove. Cloves are used in cooking and in medicine. Cloves are also used in the production of essential oils.
