

Name _____

The Science Experiment

Read the story below then answer the questions.

Samantha and her friends were excited about the 3rd grade science fair. They decided to create a volcano that would erupt. They gathered materials like baking soda and vinegar to make the volcano explode. They even mixed in red food coloring to make it look more realistic!

During the science fair, Samantha and her friends showed their volcano experiment. When they mixed the baking soda and vinegar, the volcano erupted with bubbles and smoke. Everyone thought it was the best project.
