About Stegosaurus

The name Stegosaurus means “covered lizard”. Stegosaurus was a large dinosaur with plates running along its back and spikes at the end of its tail. Stegosaurus had a very small brain (about the size of a walnut). He was a herbivore which means he was a plant eater and he may have traveled in herds. Stegosaurus was as big as 30 feet long and 14 feet tall. Stegosaurus lived during the late Jurassic period, between 150 million and 145 million years ago.

Now see if you can answer the questions below about Stegosaurus:

What does a Stegosaurus eat?

Meat

Plants

Popsicles
