About Tyrannosaurus Rex

The name Tyrannosaurus means “tyrant lizard”. Tyrannosaurus is also known as T. Rex and was a large carnivore which means he was a meat eating dinosaur. Tyrannosaurus Rex is known as one of the fiercest predators and is believed to have been able to run up to 15 miles per hour to catch his prey. T. Rex was as big as 42 feet long and about 20 feet tall. Tyrannosaurus Rex lived during the Cretaceous period, between 67 million and 65 million years ago.

Now see if you can answer the questions below about Tyrannosaurus Rex:

What does a Tyrannosaurus Rex eat?
